History: This message has been replied to and forwarded.

We are very interested in this program and hope we can work together. All of our work has been based on community outreach and look forward to an inclusive process that is far and within the scope of the agreed issues within these projects (rad study and background study). Please let me know if I've understood how this can work for our community. We have a location that features the history of the site and all the possible tools for educating the public and feel that using those resources is a critical part of being effective communicators with the public. As per my discussion with Craig, we have some ongoing public outreach and we would like to incorporate into this if possible to maximize usefulness of the program.

Thanks and we look forward to speaking with you further on the TASC program for SSFL.
